MUSIC

THE PLANET

## WAYS TO REDUCE STREAMING'S IMPACT

# 1

### USE SMALLER DEVICES

Using your smart phone or tablet uses a lot less electricity to listen to music.

# 2

### WAIT!

Do you really need a new device because it just came out? Over consumption harms the planet, and disposal of electronic devices adds to that misery.

# 3

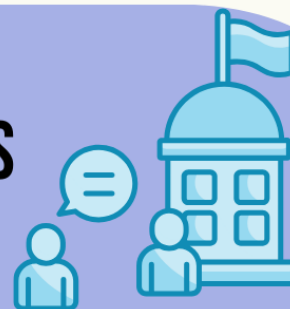

### DOWNLOAD *instead of* STREAMING

Listening to downloads uses much less energy.

# 4

### TAKE ACTION - LOBBY STREAMERS

K-Pop fans were successful in forcing Korean streamers to be take more sustainable actions.

# 5

### DEEP LISTENING

Instead of amassing more and more music, for background noise, really listen to each song. Better for your psyche!
